## DETAILED ACTION

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gur et al., in view of Edic et al.

Regarding claim 1, 2, and 6 Gur et al., discloses a collimated radiation apparatus for mammography with features of the claimed invention including an x-ray source, an x-ray image receiver from the source, and a beam collimator positioned between the source and means for compressing tissue. Gur et al., does not disclose the displacement of the collimator between two positions. Utilization of a movable collimator for general enhancement of radiation results, however, is notoriously known. Edic et al., for example is presented to show such assertion. Edic et al., discloses a method and apparatus for scanning an object teaching the use of a movable collimator plate in various positions where no x-ray exposure is conducted to a position before x-ray exposure is initiated. Therefore, it would have been obvious to one having ordinary

skill in the art at the time the invention was made to modify Gur et al., using the teaching of Edic et al., to make provision for the motion of the collimator in order to generally reduce the contribution of the scattering signals and for the reasons presented in Edic et al., col. 1.

Regarding claim 3-5, Edic et al., discloses the motion in various directions.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Max H. Noori whose telephone number is (703) 308-5248. The examiner can normally be reached on Monday-Friday from 8:00 AM to 5:30 PM.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0956. The fax number for this group is (703) 308-7382.
